

Figure 1 displays the distribution of 12 variables across six risk levels (R1 to R7) and a Very Normal (VN) category. The variables are grouped into three rows: Moderate, Severe, and Extreme. The columns represent the variables: Number of Month, Severity, Spatial Extent, Duration, Inter-Arrival, and a final column for the risk levels (R1 to R7, VN). The y-axis for Number of Month ranges from 0 to 120. The y-axis for Severity ranges from 0 to -500. The y-axis for Spatial Extent ranges from 0 to 35. The y-axis for Duration ranges from 10 to 10. The y-axis for Inter-Arrival ranges from 0 to 100. The x-axis for all charts is labeled R1, R2, R3, R4, R5, R6, R7, VN.
